THE COSMIC STRANGERS

The boys of the Cosmic Strangers were just that when forming together, strangers. Lead singer Zac Chastain and drummer Brandon Singleton went to school together and have played in various bands throughout the years and finally joined together forming The Cosmic Strangers. Afterwards lead guitar player and singer Slaten Dooley joined in and following was bass player Trevor Dennison. Together they have been creating and writing since 2019 and have released their debut album *The Sound* independently for 2022. They have worked to create a style of music that pulls from souther rock and funk with country inspired lyrics from life experiences that are sure to connect with people. Be on the lookout for The Cosmic Strangers in the near future.
